CLUES IN THE PHOTO

1. **White angled struts at top left resembling the London Eye A-frame legs, with a pier/pontoon below**
   The slanted white supports and adjacent pier match the London Eye and its Waterloo Millennium Pier on the South Bank.
2. **Red double-decker buses on the far embankment road**
   Red buses along a riverside road strongly suggest London, likely Victoria Embankment across the river.
3. **Wide grey-brown tidal river consistent with the Thames**
   The broad, murky, choppy water fits the tidal Thames in central London.
4. **Riverside railing with maroon handrail, white balusters and teal posts on a granite plinth, as on the Queen's Walk**
   This railing design is characteristic of the South Bank promenade near Jubilee Gardens in London.

EXPLANATION BY WYSS TERRA LOCATOR

The red double-decker buses, the wide tidal river and the grand stone buildings on the far bank place this on the Thames in central London. The white angled struts and floating pier at the top left match the London Eye's support legs and the London Eye Pier, which puts the camera on the Queen's Walk on the South Bank, looking north-west across to Victoria Embankment. The railing style and granite plinth match that stretch of walkway, and the UK-brand bicycle fits. The exact position along the walk is uncertain; it is probably just north or south of the Eye, near Jubilee Gardens, but could be somewhat further along the South Bank.

REVIEW BY WYSS TERRA VERIFIER

Verdict	Confirmed: the review arrived at the same place.
Distance between estimates	30 m
Note	I checked each cited cue against the photo: the red buses, white river boat, stone embankment buildings, angled white struts with a pier at top left, and the Viking bicycle are all visible and consistent with the Queen's Walk beside the London Eye. I kept the candidate location, shifting the point only marginally and tightening the radius slightly.
